

## Installing the Segal Konica Minolta Bizhub C258 Printer – Instructions for MAC OS

### Download and install the printer driver:

- Go to the web to download the driver for your Mac OS:  
<https://onyxweb.mykonicaminolta.com/onestopproductsupport?appMode=public&productId=1876>
- Click on the **Drivers** tab, then select the Mac OS version corresponding to the version installed on your computer)
- Select and download the .zip file **C759 C658\_C368\_C287\_C3851\_Series\_MacOS\_v11.1.1.zip**
- Once downloaded, double-click **C759 C658\_C368\_C287\_C3851\_Series\_MacOS\_v11.1.1.zip** to extract the installer files
- Run the extracted **.pkg** file and follow the prompts to complete installation. (When prompted, click **Agree** to the software license agreement. When prompted, you will need to enter the Administrator password for your Mac to install the software.)

### Add the printer:

- Open **System Preferences** and **Printers & Scanners**
- Click "+" under Printers list to add a printer
- In the *Add Printer* window click **IP**
- For *Protocol*: select the **LPD** option
- For *Address*: **129.105.102.61**
- For *Name (for example)*: **Segal First Floor KONICA MINOLTA C258**
- For *Use (or Print Using)*: Use the pull-down menu to **Select Software...**
- In the filter, start typing **Konica C258** to narrow down the list and then select **Konica Minolta C258 PS**
- Optionally, for **Location**, you may want to enter a description to identify this printer in Segal (first floor).
- Click **Add**
- Finally, configure these settings (leave other settings not listed below as is):

Function Version: **4.0 or higher**

Paper Source Unit: **PC-210**

Finisher: select **FS-533**

Punch Unit: **none**

Hard Disk: should be **checked**

Public User: should be **checked**

- Click **OK**
- Close **Printers & Scanners**

You should now be able to print to this printer.
